- Which one of the following is the simplified form of $\sqrt{rr_1r_2r_3}$ (With usual (18)notations)?
 - A. Δ C. Δ^3

 $\frac{\Delta^2}{\sqrt{\Delta}}$ B. D.

- The value of $\tan \left[\cos^{-1}\left(\frac{1}{2}\right) \sin^{-1}\left(-\frac{1}{2}\right)\right]$ is: A. 0 \bigcirc B. 0.5 C. undefined \bigcirc D. 1 (19)

- (20)
- Solution set of $sinx = -\frac{\sqrt{3}}{2}$ is: A. $\left\{\frac{4\pi}{3} + 2n\pi\right\} \cup \left\{\frac{5\pi}{3} + 2n\pi\right\}$ B. $\left\{\frac{\pi}{3} + 2n\pi\right\} \cup \left\{\frac{2\pi}{3} + 2n\pi\right\}$ C. $\left\{\frac{\pi}{3} + 2n\pi\right\} \cup \left\{\frac{4\pi}{3} + 2n\pi\right\}$ D. $\left\{\frac{\pi}{2} + 2n\pi\right\} \cup \left\{\frac{3\pi}{2} + 2n\pi\right\}$

Federal Board HSSC-I Examination Mathematics Model Question Paper (Curriculum 2000)

Time allowed: 2.35 hours Total Marks: 80

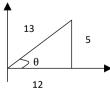

Sections 'B' and 'C' comprise pages 1-2 and questions therein are to be answered on the separately provided Answer Book. Write your answers neatly and legibly.

SECTION – B (Marks 48)

0.2 Attempt any **TWELVE** parts. All parts carry equal marks. $(12 \times 4 = 48)$

- If $= \sqrt{2} i$, then show that a. $z^2 + \bar{z}^2$ is a real number. i.
- $(z \bar{z})^2$ is a real number.
- Prove that $p \to q = \sim (p \land \sim q)$ ii.
- If $A = \begin{bmatrix} 1 & 2 & -1 \\ -3 & -2 & 2 \\ 1 & 2 & -3 \end{bmatrix}$, then find: iii.
 - A_{11} , A_{21} and A_{31}

- |A|
- Solve the system of equations: $y = 25x^2 9x + 2$; y + 2 = 11xiv.
- Show that the roots of (x p)(x q) + (x q)(x r) + (x r)(x p) = 0v. are real and they cannot be equal unless p = q = r.
- Resolve $\frac{2x-3}{(x^2-x+1)(3x-2)}$ into partial fraction. vi.
- If b, c, p, q, r are in A.P. then prove that b + r = c + q = 2pvii.
- viii. The pth term of an H.P. is q and the qth term is p. Find the (pq)th term of H.P.
- Find the number of permutations of all the letters in the word "HOCKEY" such ix. that
 - the letters C and K are placed together. a.
 - h. the letters C and K are not placed together.
- If a be nearly equal to b, then prove that $\frac{b+2a}{a+2b}$ is nearly equal to $\sqrt[3]{\frac{a}{b}}$. X.
- In the given figure, prove that xi.
 - $\sec^2\theta \tan^2\theta = 1$
 - $cosec^2\theta \cot^2\theta = 1$ b.

- Deduce $tan(\alpha \beta) = \frac{tan\alpha tan\beta}{1 + tan\alpha tan\beta}$ from fundamental law of trigonometry. xii.
- Sketch the graph of $y = cos\left(\frac{\pi}{6}x\right)$ for $-4 \le x \le 4$. xiii.

- xiv. Using Law of Cosines, prove that $\frac{\cos \alpha}{a} + \frac{\cos \beta}{b} + \frac{\cos \gamma}{c} = \frac{a^2 + b^2 + c^2}{2abc}$ with usual notations.
- xv. Prove that $4 \tan^{-1} \frac{1}{5} \tan^{-1} \frac{1}{239} = \frac{\pi}{4}$.
- xvi. Solve sinx + cosx = 1 for all real values of x.

SECTION – C (Marks 32)

Note: Attempt any **FOUR** questions. All questions carry equal marks. $(4 \times 8 = 32)$

Q.3 Solve the following system of linear equations by reducing its augmented matrix to the reduced echelon form

$$4x + 8y + z = 5$$

$$2x - 3y + 2z = -5$$

$$x + 7y - z = 10$$

- Q.4 Find the conditions that one root of the equation $ax^2 + bx + c = 0$, $(a \ne 0)$ may be
 - i. three times the other
- ii. square of the other.
- iii. Additive inverse of the other
- iv. multiplicative inverse of the other
- Q.5 Show that $(2^{\frac{1}{4}})(4^{\frac{1}{8}})(8^{\frac{1}{16}})(16^{\frac{1}{32}})... \infty = 2$
- Q.6 Prove that $3^n + 2^{n-1} < 4^n$ by the principle of extended mathematical induction.
- Q.7 Prove the following identities:
 - i. $sin3\theta + sin5\theta + sin7\theta + sin9\theta = 4cos\theta sin6\theta cos2\theta$
 - ii. $cos5\theta + cos\theta + 2cos3\theta = 4cos3\theta cos^2 \theta$
- Q.8 A poster 4 feet high and 8 feet from the ground is being observed on a wall. If the observer is standing x feet from the wall and his eye is 5 feet from the ground level, then show that

$$\theta = \tan^{-1}\left(\frac{4x}{x^2 + 21}\right).$$

MATHEMATICS HSSC-I (2nd Set) Student Learning Outcomes Alignment Chart National Curriculum 2000

S#	Section: Q. No. (Part no.)	Contents and Scope	Student Learning Outcomes
1	A: 1(1)	Concept of Complex Numbers	To know the conjugate of a complex number;
	11. 1(1)	and Basic Operations on them	To know the additive and multiplicative
		Conjugate and its properties	identities of complex numbers and to find the
		J. J. G	additive and multiplicative inverses.
2	A:1(2)	Revision of the work done in	Sets and their types; operations on sets
	,	the previous classes	and verification properties of operations
			on sets.
3	A: 1(3)	Revision of the work	A matrix, its rows and columns and order of
		done in the previous	a matrix, conformability of addition and
		classes	multiplication of matrices.
4	A: 1(4)	Application of Remainder	To apply remainder theorem in
		Theorem in the Solution of	finding one or two rational roots of
		Equations	cubic and quadratic equations
5	A: 1(5)	Relations between the Roots and	To establish the relations between roots and
		Co-efficient of Quadratic	coefficient of a quadratic equation and their
		Equations	applications.
6	A: 1(6)	Partial Fractions	To distinguish identities from conditional
			equations
7	A: 1(7)	Geometric Series	To establish the formulas for finding the sum
			of geometric series upto infinity
8	A: 1(8)	Geometric Series	To establish the formulas for finding the
			sum of geometric series upto infinity
9	A: 1(9)	Probability(Basic Concepts and	To know the formula for finding the
		Estimation of Probability)	probability;
			To apply the formula for finding
			probability in simple cases
10	A: 1(10)	Permutations	To understand the meaning of permutation of
			n different things taken r at a time and know
			the notation ⁿ P _r
11	A: 1(11)	Binomial Sequence for	To find the general term in the expansion of
		positive integral indices	$(a+b)^n$ and find their particular terms
			(Without expansion)
12	A: 1(12)	Binomial Sequence for	To state binomial theorem for rational
		negative integral and rational	indices and to find number of terms
		indices	
13	A: 1(13)	Relation between the length of an	•
		arc of a circle and the circular	the radius of the circle, l is a length of
		measure of its central angle	the arc and θ is the circular measure of
	4 4 4 4 4		the central angle of arc
14	A: 1(14)	Trigonometric Ratios of	To find the trigonometric functions of
4.5	A 424 =\	Allied Angles	the angles
15	A: 1(15)	Fundamental Formulas of	To establish the formula:
		Sum and Difference of	$\cos(\alpha - \beta) = \cos\alpha\cos\beta + \sin\alpha\sin\beta$
		Two Angles and their	and its deduction
1.	A 1/10	Application	TD 1 d d 1 cd cd
16	A: 1(16)	Graphs of Trigonometric	To know that the graphs of the trigonometric
		Functions	functions are repeated depending upon the

period of the functions	,
1	
	apply the formula for
finding the area of the	e triangular region;
$\Delta = \frac{1}{2}absin\gamma$	
18 A: 1(18) Radii of Circles connected To find the radii of	
with Triangles b) In-circle	
c) Escribed circle of tr	iangles and to
solve problems involv	
	nd principle trigonometric
functions, their inverses	
20 A: 1(20) Solution of Trigonometric To solve trigonometric	
Equations make use of the period	
functions for finding	
solution of the equation	_
	operation on complex
Numbers and Basic numbers;	-r-timen on complex
Operations on them. To know the conjugation of them.	ite of the complex
Conjugate and its properties numbers	ac of the complex
	ogical statements and
on Sets their composition;	7510ai statements and
Truth values and trut	th tables of logical
statements and their	_
23 B: 2(iii) Determinants and their Concept of a determinants	
Algebra of the Matrices matrix expansion of the matrix	
Algebra of the Matrices upto order 4, to write cofactors of the elem	
24 B: 2(iv) Solution of a system of Two Figure 1 To solve a system of When	two equations,
a) one of them is line	on and the other is
quadratic in two vari	
25 B: 2(v) Relations between the Roots To find the nature of	
and Co-efficient of Quadratic quadratic equation v	vith rational
Equations coefficients.	
	to partial fractions when
its denominator consist	
c) non-repeated quadra	
	rtaining to the terms of an
A.P.	C1 :
28 B: 2(viii) Harmonic Sequence To find the nth term	
progression (H.P) an	
solving related proble	
29 B: 2(ix) Permutations To establish formula	
it in solving problem	_
number of arrangement	ents of n things
taken r at a time	
30 B: 2(x) Binomial Series To be able to identify	
	given series as a
binomial expansion a	_
binomial expansion a sum of series	and hence find the
binomial expansion a sum of series 31 B: 2(xi) Trigonometric Functions To establish the following the following sum of series To establish sum	and hence find the owing relations
binomial expansion a sum of series 31 B: 2(xi) Trigonometric Functions To establish the followed between the trigonometric functions	owing relations netric ratios;
binomial expansion a sum of series 31 B: 2(xi) Trigonometric Functions To establish the followhere the trigonometric functions $1 + \tan^2 \theta = \sec^2 \theta$	owing relations netric ratios;
binomial expansion a sum of series 31 B: 2(xi) Trigonometric Functions To establish the followed between the trigonometric functions	and hence find the owing relations netric ratios; θ and θ

	T		
			mentioned relations in
			b) proving the trigonometric identities
32	B: 2(xii)	Fundamental Formulas of	To establish the formula:
		Sum and Difference of	$\cos(\alpha - \beta) = \cos\alpha\cos\beta + \sin\alpha\sin\beta$
		Two Angles and their	and deduction there from, for finding
		Application	the sum and difference of the
			trigonometric ratios
33	B: 2(xiii)	Graphs of Trigonometric	To draw the graphs of the six basic
		Functions	trigonometric functions.
34	B: 2(xiv)	Cosine Formula	To establish the cosine formula and
			apply it in the solution of oblique
			triangles
35	B: 2(xv)	Inverse Trigonometric	Development of formulas for inverse
	, ,	Functions	trigonometric functions
36	B: 2(xvi)	Solution of Trigonometric	To solve trigonometric Equations and
	, ,	Functions	to make use of the period of
			trigonometric functions for finding the
			general solution of the equations
37	C: 3	Solving Simultaneous	To be able to solve a system of linear
		Linear System of	non-homogeneous equations by the use
		Equations	of
		-	b) echelon and reduced echelon form
38	C: 4	Relations between the	To establish the relations between
		Roots and Co-efficient of	roots and coefficient of a quadratic
		Quadratic Equations	equation and their applications.
39	C: 5	Geometric Series	To establish the formulas for the sum
			of geometric sequence upto infinity
40	C: 6	Introduction and	Principle of mathematical induction
		Application of	and its various applications
		Mathematical Induction	
41	C: 7	Sum, Difference and	To find the formulas for the following
		Product of the	$sin\alpha \pm sin\beta$; $cos\alpha \pm cos\beta$
		Trigonometric Ratios	_ , , _ ,
42	C: 8	Heights and Distances	To be able to use solution of right
-			triangles in solving the problems of
			heights and distances.

MATHEMATICS HSSC-I (2nd Set) Table of Specification

Topics	1. Number Systems	2. Sets, Functions and Groups	3. Matrices and Determinants	4. Quadratic Equations	5. Partial Fractions	6. Sequences and Series	7. Permutation, Combination and Probability	8. Mathematical Inductions and Binomial Theorem	9. Fundamentals of Trigonometry	10. Trigonometric Identities	11. Fundamentals of Trigonometry	12. Application of Trigonometry	13. Inverse Trigonometric Functions	14. Solution of Trigonometric Equations	Total marks for each assessment objective	% age
Knowledge based	1i(1) 2i(4)	1ii(1) 2ii(4)		4(8) 2iv(2)	1vi(1) 2vi(4)		1ix(0.5) 1x(1)	1xi(1) 6(8) 2x(4)			2xiii(2)	1xvii(1)		1xx(1)	43.5	32.95%
Comprehension based			1iii(1) 2iii(4) 3(8)	2iv(2) 2v(4) 1v(1)		5(8) 1vii(1) 1viii(1) 2vii(4) 2viii(4)	Č	1xii(1)		1xiv(1) 2xii(4) 7(8) 1xv(1)		1xviii(1)	2xv(4) 1xix(1)	2xvi(4)	63	47.73%
Application based				1iv(1)			2ix(4) 1ix(0.5)		2xi(4) 1xiii(1)		1xvi(1) 2xiii(2)	8(8) 2xiv(4)			25.5	19.32%
Total marks for each topic	05	05	13	18	05	18	6	14	05	14	05	14	05	05	132	100%

KEY:

1(1)(01)

Question No (Part No.) (Allocated Marks)

Note: (i) The policy of FBISE for knowledge based questions, understanding based questions and application based questions is approximately as follows:

- a) 30% knowledge based.
- b) 50% understanding based.
- c) 20% application based.
- (ii) The total marks specified for each unit/content in the table of specification is only related to this model question paper.
- (iii) The level of difficulty of the paper is approximately as follows:
 - a) 40% easy
 - b) 40% moderate
 - c) 20% difficult
