# Federal Board SSC-I Examination Chemistry Model Question Paper (Curriculum 2006)

Time allowed: 2.40 hours Total Marks: 53

Note: Answer any eleven parts from Section 'B' and attempt any two questions from Section 'C' on the separately provided answer book. Write your answers neatly and legibly.

## **SECTION – B** (Marks 33)

Q.2 Attempt any ELEVEN parts from the following. All parts carry equal marks.

 $(11 \times 3 = 33)$ 

- i. Differentiate between analytical and physical chemistry (at least two).
- ii. Explain the method of preparation of 0.5M NaOH in 100cm<sup>3</sup> solution from 1M NaOH.
- iii. Draw the structure of isotopes of chlorine.
- iv. Briefly explain octet and duplet rule with example.
- v. Identify the characteristic of ionic compounds.
- vi. Demonstrate diffusion and effusion of the gasses with the help of examples.
- vii. Differentiate between saturated and unsaturated solutions (at least two).
- viii. Describe the formation of solution by mixing solid into gases with example.
- ix. State the common rules for assigning the oxidation number.
- x. List three uses of electrolytic cells.
- xi. Write down the oxidation and reduction reaction in voltaic cell at Anode and Cathode.
- xii. Show how cations and anions are related to term metals and nonmetals.
- xiii. Briefly describe why alkali metals are not found in free state in nature.
- xiv. Tabulate soft and hard metals with suitable examples.
- xv. List the commercial value of silver, gold and platinum.

#### **SECTION** – C (Marks 20)

**Note:** Attempt any **TWO** questions. All questions carry equal marks.  $(2 \times 10 = 20)$ 

- Q.3 a. Differentiate between oxidation and reduction in term of oxygen and hydrogen with equations. (2+2)
  - b. Identify the relationship between electronic configuration and the position of an element in the periodic table. <sub>19</sub>K<sup>39</sup>,<sub>17</sub>Cl<sup>35</sup> and <sub>16</sub>S<sup>32</sup> (6)
- Q.4 a. Define empirical and molecular formula. Show the formation of empirical formula from molecular formula of the given compounds:  $C_6H_{12}O_6$ ,  $C_8H_{16}O_2$  and  $C_{12}H_{22}O_{11}$ . (6)
  - b. Compare the physical state of matter with regards to intermolecular forces between them. (4)
- Q.5 a. Use the rule that "like dissolves like" Describe dissolution of KCl in water with the help of diagram. (4+2)
  - b. How will you discuss the reactivity of halogens by using following reactions: (4) i)  $KI + Br_2 \longrightarrow 2KBr + I_2$ 
    - i)  $KI + Br_2$   $\longrightarrow$   $2KBr + I_2$ ii)  $KBr + Cl_2$   $\longrightarrow$   $2KCl + Br_2$

\* \* \* \* \*

# CHEMISTRY SSC-I (3<sup>rd</sup> Set) Student Learning Outcomes Alignment Chart

#### **SECTION A**

## **Q.1**

- 1. Determine the oxidation number of an atom of any element in a compound.
- 2. Differentiate between amorphous and crystalline solids.
- 3. Describe how electronegativities change within a group and within a period in the periodic table.
- 4. Classify the elements (into two categories: groups and periods) according to the configuration of their outer most electrons.
- 5. Recognize the similarity in the chemical and physical properties of elements in the same family of elements.
- 6. Solve problems involving the Molarity of a solution.
- 7. Show how cations and anions are related to the terms metals and non-metals.
- 8. Classify the chemical species from given examples.
- 9. Define relative atomic mass based on C-12 scale.
- 10. Explain how shielding effect influences periodic trends.
- 11. Differentiate between solutions, suspension and colloids.
- 12. Describe the formation of a covalent bond between two non-metallic elements.

#### **SECTION-B**

# **Q.2**

- i. Differentiate between branches of chemistry.
- ii. Describe how to prepare a solution from given molarity.
- iii. Draw the structure of different isotopes from mass number and atomic number.
- iv. State the octet and duplet rules.
- v. Describe the characteristics of an ionic bond
- vi. Explain the properties of gases (diffusion, effusion and pressure).
- vii. Explain the difference between saturated, unsaturated and supersaturated solutions.
- viii. Explain the formation of solutions (mixing solids into gases, solids into liquids, solids into solids) and give an example of each.
- ix. State the common rules used for assigning oxidation numbers to free elements, ions (simple and complex), molecules, atoms.
- x. List the possible uses of an electrolytic cell.
- xi. Identify the half-cell in which oxidation occurs and the half-cell in which reduction occurs given a voltaic cell.
- xii. Show how cations and anions are related to the terms metals and non-metals.
- xiii. Explain why alkali metals are not found in the Free State in nature.
- xiv. Differentiate between soft and hard metals (Iron and Sodium).
- xv. Identify the commercial value of Silver, Gold and Platinum.

#### **SECTION-C**

- Q.3 a. Define oxidation and reduction in terms of loss or gain of oxygen or hydrogen.
  - b. Identify the relationship between electron configuration and the position of an element on the periodic table.
- **Q.4** a Differentiate between empirical and molecular formula.
  - b. Compare the physical states of matter with regard to intermolecular forces present between them.
- **Q.6** a. Use the rule that "like dissolves like" to predict the solubility of one substance in another.
  - b. Compile some important reactions of halogens.

# CHEMISTRY SSC-I (3<sup>rd</sup> Set)

# TABLE OF SPECIFICATION

Topics/Subtopics	Fundamentals of chemistry 1	Structure of atoms 2	Periodic table 3	Structure of Molecules 4	Physical states of matter 5	Solutions 6	Electrochemistry 7	Chemical Reactivity 8	Total marks for each Assessment Objective	%age of cognitive level
(Knowledge based)		1(4)(1)			2vi(3) 2viii(3) 5a(6)		2ix(3) 2x(3)	1(7)(1) 2xiii(3) 2xiv(3)	26	29.9%
(Understanding based)	1(8)(1) 2i(3)	1(5)(1) 1(9)(1)	1(3)(1) 1(10)(1) 3b(6)	1(12)(1) 2iv(3) 2v(3) 4b(4)		1(2)(1) 1(11)(1) 2ii(3) 2vii(3)	1(1)(1) 2xi(3) 3a(4)	2xv(3)	44	50.6%
(Application based)	4a(6)	2iii(3)				1(6)(1)		2xii(3) 5b(4)	17	19.5%
Total marks for each Topic/ Subtopic	10	06	08	11	12	09	14	17	87	100%

## KEY:

1(1)(1)

Question No. (Part No.) (Allocated Marks)

**Note:** (i) The policy of FBISE for knowledge based questions, understanding based questions and application based questions is approximately as follows:

- a) 30% knowledge based.
- b) 50% understanding based.
- c) 20% application based.
- (ii) The total marks specified for each unit/content in the table of specification is only related to this model question paper.
- (iii) The level of difficulty of the paper is approximately as follows:
  - a) 40% easy
  - b) 40% moderate
  - c) 20% difficult
