Sign. of Invigilator $\qquad$

## COMPUTER SCIENCE <br> SSC-II <br> SECTION - A (Marks 13) <br> Time allowed: 15 Minutes

Section - A is compulsory. All parts of this section are to be answered on this page and handedover to the Centre Superintendent. Deleting/overwriting is not allowed. Do not use lead pencil.

## Q:1 Fill the relevant bubble for each part on bubble sheet. Each part carries one mark.

(1) What is the output of following code? int $\mathrm{a}=15$; float $\mathrm{s}=5.50$; printf (" $\% \mathrm{f}$ ", $\mathrm{a} / \mathrm{s}$ );
A. 2
B. $\quad 2.72$
C. 3
D. 5
(2) Which one of the following symbols is used in flow chart for the statement "Marks $<33$ "?
A.

B.

C.

D.

(3) Which one of the following functions is used to read string "Computer Science"?
A. $\operatorname{scanf}()$
B. gets()
C. getchar( )
D. getch()
(4) Which statement is equivalent to " $\mathrm{j}=\mathrm{j}+\mathrm{a}$;"?
A. $j+=a$;
B. $\mathrm{j}=+\mathrm{a}$;
C. $\mathrm{j}++\mathrm{a}$;
D. $\mathrm{j}=\mathrm{a}++$;
(5) Which escape sequence can be used to insert a Tab in "C" Language?
A. $\quad$ a
B. $\quad \mathrm{b}$
C. $\backslash t$
D. $\ln$
(6) Which one of the following is the most suitable for making two ways decision?
A. if statement
B. if-else statement
C. switch statement
D. Nested-if statement
(7) How many times "FBISE" will be displayed by the following code? for (int $\mathrm{i}=1 ; \mathrm{i}<10 ; \mathrm{i}=+2$ ) printf ("FBISE");
A. 1
B. 5
C. Infinite
D. The loop will not run.
(8) What is the output of the following code?

$$
\text { int } \mathrm{i} ; \text { for }(\mathrm{i}=1 ; \mathrm{i}<=2 ; \mathrm{i}++) \text { printf }(" \ln \mathrm{i}=\% \mathrm{~d} ", \mathrm{i}) \text {; }
$$

A. $\quad i=2$
B. $\quad \mathrm{i}=1$
$\mathrm{i}=3$
$\mathrm{i}=2$
C. $\quad i=1$
D. $\quad i=2$
$\mathrm{i}=3$
$\mathrm{i}=1$
(9) Which one of the following gates has an output = A.B?
A. NAND
B. NOR
C. OR
D. AND
(10) When the input to an inverter is $\operatorname{LOW}(0)$ the output will be:
A. HIGH or 0
B. LOW or 0
C. HIGH or 1
D. LOW or 1
(11) What is the output of following HTML code?

<ol>
<li> Magnetic Disk </li>
<li> CD and DVD </li>
</ol>
A. Magnetic Disk
B. 1. Magnetic Disk

- CD and DVD
C. 1. Magnetic Disk
D. Magnetic Disk
- CD and DVD
CD and DVD
(12) Which one of the following is correct HTML statements to divide browser window into 3 columns?
A. <fram col $=30 \%, 30 \%, 40 \%$ >
B. <framset col $=30 \%, 30 \%, 40 \%$ >
C. <framset $\operatorname{col} 30 \%, 30 \%, 40 \%$ >
D. <fram row $=30 \%, 30 \%, 40 \%$ >
(13) Which of the tags are correct to create list?
A. <DL> <DT></DT>
</DD>
B. <DL></DL> <DT></DT> <DD></DD>
C. <DL></DL> <DT/DT>
<DD /DD>
D. <DL/DL>
<DD>
</DD>

Time allowed: 2.45 hours

# Federal Board SSC-II Examination Computer Science Model Question Paper (Curriculum 2009) 

Total Marks: 42

## Note: Answer all parts from Section 'B' and all questions from Section 'C' on the E-sheet. Write your answers on the allotted/given spaces.

## SECTION - B (Marks 22)

Q. 2 Attempt all parts from the following. All parts carry equal marks. (11x2=22)
i. Write down any TWO important advantages of algorithm in problem solving?

## OR

Write down any TWO characteristics of flowcharts in problem solving?
ii. Point out valid and invalid variable names.
a.
Define
b. 5name c.
OR

Write down two rules for naming variables.
iii. Write down the ONE important purpose each of Conditional Statements and Repetition Statements.

## OR

State two differences between while and do-while loops.
iv. Write down any TWO characteristics of High Level Languages.

OR
Why computer understands machine language directly? Give two reasons.
v. Evaluate each of the following expression assuming, $a=2, \mathrm{z}=1.3, \mathrm{c}=1$ and $\mathrm{d}=3$ :
a. $\quad \mathrm{b}=\mathrm{d} / \mathrm{a}+\mathrm{d} \% \mathrm{a}$;
b. $\quad x=(a+c) /(z+0.3)$;
OR

Use appropriate text formatting tags for the followings with one example.

> a. font size b. font face
vi. Rewrite the code using Conditional Operator.

$$
\begin{aligned}
& \text { if (marks > 40) } \\
& \text { printf("PASS"); } \\
& \text { else } \quad \begin{array}{l}
\text { printf("FAIL"); }
\end{array}
\end{aligned}
$$

## OR

Write a C program to print sum of odd numbers from 1 to 100 .
vii. Write down the TWO benefits of web portal.

OR
Give two uses of Internet browsers.
viii. Differentiate between an assignment operator (=) and an equal to (= =) operator by giving an example.

## OR

Construct Truth Table for the following Boolean Expression:

$$
F=\overline{x y z}+\bar{x} y z+x \bar{y}
$$

ix. Write a program in C to generate the following series using for() loop.
$5 \quad 101520 \quad 253035404550$
OR
Write a program in C to find the factorial od a number.
x. What will be the output of the following code?

```
void main() {
                int u, i;
                for (u=1; u< = 5; u++)
                {
                for (i = 1; i< = u; i++)
                {
            printf("%d \t", i);
                    }
    printf("\n");
} }
OR
```

Rewrite the following code using for loop:
int sum $=0$, num $=0$;
do \{
sum = sum + num;
printf ("Enter an integer value");
scanf("\%d", \&num);
\}
while (num > = 0 \& \& num <= 15);
xi. Draw NAND $(\overline{\mathrm{xy}})$ and $\operatorname{NOR}(\overline{\mathrm{x}+\mathrm{y}})$ gates.

OR
Write down the names and purpose of any TWO format specifiers.

## SECTION - C (Marks 20)

Note: Attempt all questions. Marks of each question are given within brackets. (4x5=20)
Q. 3 Draw a flowchart to calculate the exponent of a given number.

## OR

Write a C program to print the following pattern using nesting loop.

| 5 | 4 | 3 | 2 | 1 |
| :--- | :--- | :--- | :--- | :--- |
| 5 | 4 | 3 | 2 |  |
| 5 | 4 | 3 |  |  |
| 5 | 4 |  |  |  |
| 5 |  |  |  |  |

Q. 4 Simplify the Boolean Function F, using Karnaugh Mapping (K-map).

$$
\begin{equation*}
F=x y z+\bar{x} y z+x \bar{y} z+\overline{x y} z+x y \bar{z}+\overline{x y z} \tag{5}
\end{equation*}
$$

## OR

Rewrite the following code after removing the errors:
\# include < std.h>
\# include < conio.h>
void main ();
\{ int p, s;
printf("\n Enter a number:);
scanf("\%d", p);
$\mathrm{s}=\mathrm{p} \% 2$;
if(s=0) printf("even number\%d", p)
else printf("odd number $\% \mathrm{~d}$ ", p );
getch ( ) ; \}
Q. 5 Rewrite the following program using switch statement:

```
void main()
    { char ch;
        clrscr( );
        printf("Enter a single character");scanf("%c", ch);
        if (ch = = 'a'| |ch = = 'A'|ch = ' 'e'| |ch= = 'E'|ch = = 'i'| |h ==
                            'I'| ch = = 'o'| ch = = 'O'|ch = = 'u'| |ch = = 'U')
                        printf("It is a vowel");
        else
            printf("It is a consonant");
        }
```

## OR

Write a C program to input two numbers and find the GCD (Greatest Common Deviser) of the numbers.
Q. 6 Explain FIVE modules of C programming environment.

## OR

What is the purpose of using comments in C programs? Explain the two types of comments with examples.
